Applied Digital Skills

The National Center for Families Learning (NCFL) has collaborated with Grow with Google to bring the Applied Digital Skills curriculum to family literacy and learning practitioners. We often hear that practitioners and educators in the field are seeking content to help address the digital literacy needs of learners.

Applied Digital Skills is a free, video-based online curriculum designed to prepare teens and adults for the evolving job market. The curriculum teaches project-based digital skills relevant to real-life situations like event planning, budgeting, creating a guide to an area, finding a job, and more. The curriculum can be facilitated by an instructor, or taken independently as convenient. In this session you'll hear from Google about the curriculum and best practices on how to use it to meet your goals.

After registering, you will receive a confirmation email containing information about joining the webinar.

We look forward to seeing you online soon!
